Introducing StainGuard Plus™: An Innovation in Algae Resistance

We are excited to announce the launch of StainGuard Plus™, a groundbreaking time-release algae resistance technology. This new technology is available on Timberline Ultra HD® and is backed by an extended 25-year limited warranty against algae discoloration. Please see below for more details.

What is StainGuard Plus?	New StainGuard Plus™ shingles contain time-release capsules, designed to allow for easier access to the same algae fighting copper as traditional AR granules. Instead of a rock core with a single copper layer, StainGuard Plus™ capsules are polymer based with copper dispersed throughout. Over time, natural weathering allows the polymer matrix to slowly and continuously release copper to help keep the roof stain free for longer.				
What Product?	Timberline Ultra HD®				
Availability?	Nationally				
Timing?	February 2018; rolling launch as current Timberline Ultra HD® product is depleted				
Do Not Mix?	No, this enhancement will not require a Do-Not-Mix				
What Plants?	StainGuard Plus™ will be launching on all Timberline Ultra HD® products across all four plants. New item codes are listed below:				
		Tuscaloosa	Myerstown	Michigan City	Shafter
